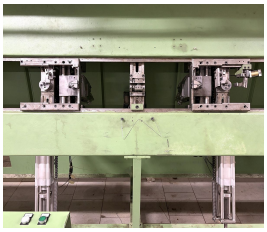
CNC WIRE BENDING LINE – FOR SALE

Double-head CNC wire bender JJ Trading JJD-08 (2024, CE) + Vitari straightener-cutter · Ø 2–8 mm



Technical data – JJ Trading JJD-08

Manufacturer / model	JJ Trading (Argenta, Italy) – JJD-08, double-head wire bender
Year / serial no.	2024 / 2403192 – built on a regenerated Montorfano GE10 frame
CE marking	Machinery Directive 2006/42/EC, IP55
Axes	5 EtherCAT servo axes (ESTUN ED3L drives): 2 carriages, 2 reversible bending units, central clamp rotation for 3D parts
Material	Wire, bar and tube Ø 2–8 mm
Output	Multiple parts per cycle: up to 13 at Ø 2 mm, 6 at Ø 4 mm, 3 at Ø 6 mm
Frame / footprint / weight	4 m frame – 4300 × 2000 × 2200 mm – 2200 kg
Control	PC-based control with touch HMI, 3D preview, simulation and collision check, remote assistance, Industry 4.0 interface (CSV)
Safety	ReeR safety module, light curtains, perimeter fencing
Utilities	400 V AC 3-phase, 50/60 Hz, 30 A – compressed air 6 bar

Included

Vitari wire straightening and cutting machine with pay-off reel and outfeed table: the line works from coil to finished part. Operating manual, CE declaration and retrofit documentation are supplied with the machine.

Condition

Installed May 2025, used intermittently for small batches and sampling until June 2026. Can be inspected and tested under power at our plant in Venosa (PZ), southern Italy.

Price: € 75,000 + VAT, EXW Venosa (Italy) – negotiable. Machines also available separately.
