

Variomat

The new Weinig Variomat

Weinig's entry level machine the Variomat is your gateway to the most advanced, profitable and innovative technology available. Ideal for accurate 4 sided planing and outstanding if your requirement is profiling.

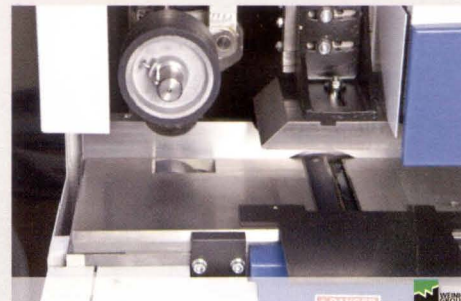

200mm Cutting Circle on top head with proven Weinig timber control by heavy duty chipbreaker and pad pressure.

Memory system and all machine controls within easy reach of the operator giving a perfect working environment. (option)

Twin driven feed rollers opposite right hand spindle guaranteeing exceptional feeding performance that only a Weinig can give.

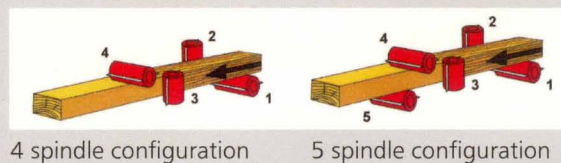

Driven table roller in the out feed. (option)

Standards:

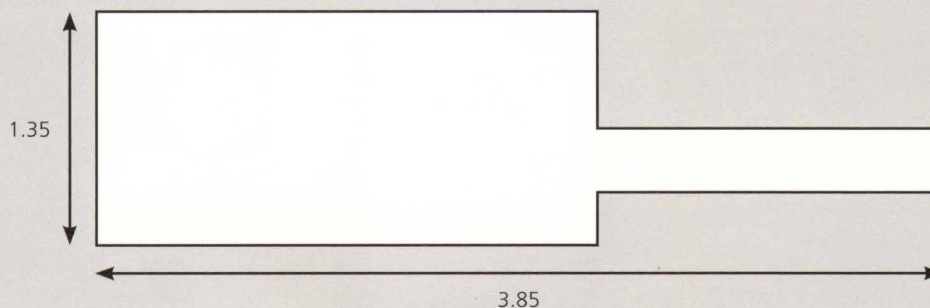

Min. / Max. working height	8/120mm
Min. / Max. working width	20/230mm
Number of spindles	4 and 5
Cast iron base prepared for retrofit modules	
Spindle cutting speed	6000 rpm
Max. tool diameter on vertical spindles	232mm
Max. tool diameter horizontal (not for 1st bottom)	200mm
Feed speed	6 and 12m/min
Motor power for vertical spindles	5.5kw-11kw
Motor power for horizontal spindles	4kw-11kw

Options:

PowerLock System on vertical spindles
Multifunction table
Variable spindle cutting speeds 3000 to 6000 rpm
Memory system
Electronic displays
CNC-controlled axes adjustments

Small machine footprint

Dimensions are approximate a fully detailed machine foundation plan available on request.
