DESCRIPTION

Industrial steam boilers are closed tanks that burn various types of fuel (natural gas or liquefied petroleum gas, diesel, fuel oil, biomass, etc.) to heat the water inside them until it evaporates.

This steam is then conveyed through a network of pipes to all parts of the factory and supplied to the machines that require it.

BURNER TYPE: DIESEL

BRAND: ECOFLAM

TYPE: MAIOR P 80 SB TL

MIN/MAX POWER: 474 KW / 949 KW

TEMPERATURE: 20 °C
