PIERALISI DECANTER

ID:

0000000199819

MAKE

PIERALISI

RPM

4100

DENSITY

1.4 Kg/dm³

TYPE

ESTRATTORE CENTRIFUGO

MODEL

MAIOR

MADE OF

STAINLESS STEEL

POWER

11.25 KW/ 15.30 HP

DESCRIPTION

The Pieralisi Decanter is a high capacity horizontal centrifuge designed for industrial applications requiring efficient solid-liquid separation.

The decanter is used for the separation of two or more specific phases of different weights, especially for the clarification of liquids in which suspended solids are present. The separation of solids and liquids takes place inside a cylindrical-conical rotating drum, on the peripheral part of which the heavier solid phase is collected and continuously removed by an internal conveyor.

- Typical applications: wastewater treatment, sludge separation, processes in the food and chemical industry.
