DESCRIPTION

The CHP 30-RS filling machine is a medium size machine designed for packing liquids or pasty products in bags of different sizes.

The filling machine is run as follows:

1. Empty the air from the bag.
2. Fill the product according to the capacity of the bag.
3. Fill the bag with air or gas (nitrogen) if there is a bacteriological problem with the product.
4. Seal the bag with an aluminium coated diaphragm, and weld it with a heat seal welding unit.

Characteristics:

- * Filling capacity: From 0 to 1500 cl Replacing the pump piston and the shirt can be achieved a capacity of filling of 2000 cl.
- * Temperature during filling 90 °C Max.
- * Package dimensions: Maximum width 120 mm. Maximum height 270 mm.
- * Package capacity: 1000 cc max.
- * Speed: 20 pcs / min.
- * Current format: 100 gr.

Production varies according to product, format and filling capacity.
