FMC-JBT STERILMATIC CONTINUOUS COOKER COOLER FOR 1 KG

ID:	0000000202406
MAKE	JBT
PRODUCTION	350 CANS/MIN
MAX TEMPERATURE	143°C
MIN TEMPERATURE	20°C
CURRENT FORMAT (KG)	1
WORKING PRESSURE	2.3 bar
PRESSURE TEST	4.6 bar
MODEL	STERILMATIC
CURRENT FORMAT (MM)	99

FMC-JBT STERILMATIC CONTINUOUS COOKER COOLER FOR 1 KG

SPACE TOTAL DIMENSIONS

LENGTH	13,000 m	WIDTH	6,000 m	HEIGHT	2,300 m	WEIGHT	0,00 Kg
--------	----------	-------	---------	--------	---------	--------	---------

DESCRIPTION

Autoclaves are used for the sterilization of packaged products that need to reach high temperatures (+100°C) for the elimination or inactivation of pathogenic microorganisms.

Continuous autoclaves: They are inserted inside the production lines. In them, the containers enter inside automatically and come out at the other end already sterilized. This allows us to reach much higher production volumes.

- FMC-JBT rotary cooker-coolers: they consist of two or more bodies in which each sterilization phase is carried out.

Measurements:

Module 1: 9 m x 2 m x 2.30 m.

Module 2: 9 m x 1.55 m x 2.30 m.

Module 3: 13 m x 2.10 m x 2.30 m.

Production may vary depending on the format.
