MAQUINARIA PARA LA INDUSTRIA ALIMENTARIA

S/S GRAVITY FILLER

ID:

0000000198983

PRODUCTION

80 CONTAINERS/MIN

MAX FILLING CAPACITY

1 L

INCLUDED

ELECTRIC CABINET

INCLUDED

VARIATOR MECHANIC MOTOR

MADE OF

STAINLESS STEEL

NUMBER OF VALVES

12

DESCRIPTION

As its name suggests, temporary gravity filling (auto-flow) uses the principle that the liquid descends by gravity to determine the filling volume by setting the stop time. This type of filling machine is suitable for use in thin and fluid liquids, which is generally applied to products that do not require high precision, such as juice, beverage, etc.

Special for juice blending.

* Production may vary depending on the format and product to be filled.
