

JUKI DLN-5410N-7 Industrial Needle Feed Lockstitch Sewing Machines – Factory Matched Production Set (Lot of 4)

Premium Matched Set of Four Professional JUKI Needle Feed Sewing Machines from the MASI JEANS Factory

This lot consists of four JUKI DLN-5410 series industrial needle-feed lockstitch sewing machines, removed directly from the professional production lines of the former MASI JEANS factory in Estonia.

The JUKI DLN-5410N-7 is one of the world's most respected industrial needle-feed lockstitch sewing machines, renowned for its exceptional reliability, high sewing speeds and outstanding stitch quality. Its needle-feed mechanism synchronizes the movement of the needle with the feed dog, significantly reducing material slippage, seam puckering and ply shifting compared to conventional drop-feed machines.

All four machines were installed on the same production line and maintained under the same factory maintenance program, making this an excellent opportunity to acquire a complete, factory-matched production set with identical operating characteristics, common spare parts and simplified maintenance.

Ideal for denim manufacturing, workwear, uniforms, technical garments and other medium-weight industrial sewing applications.

Bundle Contents

Machine 1

Model: JUKI DLN-5410N-7

Year: 2009

Internal Reference: 23A-7222

Manufacturing Number: 2D3BE00023

Machine 2

Model: JUKI DLN-5410N-7

Year: 1999

Internal Reference: 26A-7003

Manufacturing Number: 2D3BF00270

Machine 3

Model: JUKI DLN-5410N-7

Year: 2009

Internal Reference: 27A-7226

Manufacturing Number: 2D3BE00024

Machine 4

Model: JUKI DLN-5410-7

Year: 2009

Internal Reference: 17B-7224

Manufacturing Number: DLNAJ38908

Technical Specifications

Manufacturer: JUKI Corporation

Model Series: DLN-5410N-7 (3 machines) / DLN-5410-7 (1 machine)

Machine Type: Industrial Single Needle Needle Feed Lockstitch Sewing Machine

Country of Manufacture: Japan

Maximum Sewing Speed: Up to 5,000 stitches per minute

Maximum Stitch Length: 4.0 mm

Needle System: DB×1

Presser Foot Lift: 5.5 mm by hand / 13 mm by knee lifter

Feed Mechanism: Needle Feed with Bottom Feed

Lubrication System: Fully Automatic Centralized Lubrication

Integrated Electronic Control System

Automatic Thread Trimmer

Automatic Backtacking

Automatic Needle Positioning

Industrial Sewing Table and Heavy-Duty Steel Stand

Production Benefits

- Needle-feed system minimizes material slippage and seam distortion
- Excellent stitch quality on multi-layer fabrics
- Consistent seam appearance at high sewing speeds
- High productivity in continuous industrial operation
- Reliable Japanese engineering
- Proven long-term durability in professional garment manufacturing

Why Purchase This Lot

- Four matching production machines from the same factory
- All machines used on the same production line
- Consistent sewing quality across all workstations
- Common spare parts inventory
- Simplified maintenance procedures
- Reduced operator training requirements
- Cost-effective way to establish or expand a production line

Applications

- Denim manufacturing
- Jeans production
- Workwear
- Uniform production
- Technical garments
- Medium-weight woven fabrics
- Shirt manufacturing
- Industrial garment production

Condition

Previously used in professional garment production.

All machines remained in operation until the recent closure of the MASI JEANS factory.

Good overall industrial condition with normal cosmetic wear consistent with factory use.

Available for inspection before dismantling.

Location

Valga, Estonia

Dismantling & Transport

Buyer is responsible for dismantling, loading and transportation.

Sales Terms

Sold as-is, where-is, without warranty.

Part of the MASI JEANS factory liquidation.

The machines are offered primarily as one complete factory-matched production set. Individual sales may be considered subject to the prior sale status of the complete lot.
