

We invite you to purchase a NEW and outstanding 5-AXIS MACHINING CENTER from the renowned company FANUM.

www.fanum.pl

We offer the new SIGMA device, which comes exceptionally well-equipped. The machine is completely new, and the attached specification details its functions, parameters, and production capabilities. FANUM has been known for many years for its reliability, precision, high power, and fast working speed.

The MACHINING CENTER we offer is BRAND NEW. It was purchased from FANUM Sp. z o.o. in 2021 and delivered to our premises by the manufacturer. The FANUM Sp. z o.o. service team only commissioned the machine, and it has not been used since. Its condition can be considered completely NEW.

Our model is exceptionally well-equipped and has practically everything you might need. Currently, a new device costs around EUR 282 350 net, which is PLN 1 200 000 net.

We invite you to visit the manufacturer's website:

<https://www.fanum.pl/produkty/maszyny-cnc-specjalistyczne/>

We have direct contact with and support from the manufacturer, FANUM Sp. z o.o. Another start-up inspection and demonstration can be arranged at our location. Of course, it is also possible to transport the device to the new owner and have the FANUM machine installed and started up at their site.

The price we propose includes the device itself, although we can also offer a quote with installation and commissioning at the new location. In our opinion, the discount we offer, over 40% (more than EUR 117 640 Euro net, about PLN 500 000 net) off the value of a new machine, makes this an extremely attractive price for anyone currently looking for a similar device for their machine park, or who did not expect, within their established budget for a MACHINING CENTER, to be able to purchase a modern, new, and exceptionally efficient machine.

General remarks regarding the sales offer:

- Although the machine is NEW, it was manufactured in 2021, and we do not offer any guarantee or warranty;
- The device cannot be returned;
- The price in the advertisement does not include VAT (23% for buyers in Poland), which will be added to the invoice—please check how the price is stated in the ad;
- Single owner.

* Price in EUR calculated based on the NBP exchange rate – 1 EUR = 4.25 PLN.

Welcome to all users of the MACHINESEEKER platform. We are new users of MACHINESEEKER. We are not a furniture, manufacturing, or machine trading company. We own numerous properties in Poland and are a developer building houses and apartments in Warsaw (the capital of Poland).

The machines listed in the offer are our property. We acquired them in settlements with our tenants from the furniture industry. We know their history and condition, which is consistent with our descriptions.

We are in contact with the machine manufacturers, who can provide additional support – Homag, Otto Martin, OMC Machinery, and FANUM. Since we do not need these machines, our prices are very attractive, especially since the machines are practically new. We can assist with transportation anywhere in Poland or the EU. You are welcome to inspect the machines before purchase. Best regards.
