Multi-Ply CNC Cutting & CAD System

Complete High-Efficiency Garment & Textile Cutting Solution

MC30 Master Cut Multi-Ply

CNC AUTOMATIC CUTTER

Cutting Capacity: 30 mm (3 cm) compressed under vacuum.

Fabric Width: 180 cm working area.

High Precision: 6,000 RPM knife vibration motor with smart knife control.

Advanced Options: Vortex knife cooler & 5mm auto cold drill punch.

Value Package: Includes 36 spare blades.

(Requires 3 phase electricity and compressed air)

MN1 Mini Master

FABRIC SPREADER

Spreading Width: 180 cm.

Versatile Handling: Perfect for low-gsm materials, including knit and woven fabrics with high Lycra ratios.

Tension-Free Spreading: Cradle feed with solid PVC belt & dancer bar.

Laying Up Table: MSA Air Flotation Table (9m length x 200cm width).

Smart Control: Touchscreen display with auto end-cutter & movable catcher.

ML2 Mini Lift

FABRIC LOADING DEVICE

Fabric Width: Accommodates rolls up to 180 cm.

Light Duty Loading: Motorised roll lifter simplifies heavy roll handling.

Ergonomic Operation: Reduces operator fatigue & speeds up roll changes.

Seamless Integration: Synchronised directly with the MN1 Spreader.

Multi-Ply CNC Cutting & CAD System

Complete High-Efficiency Garment & Textile Cutting Solution

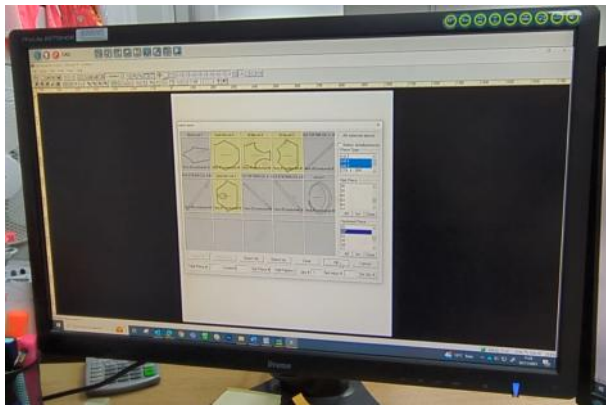

iDigit Photo Digitiser

Pattern Digitalisation System

Board Dimensions: 1.5m x 1.2m calibrated board.

Fast Conversion: Instantly converts paper or cardboard patterns into precise digital CAD DXF format.

High Accuracy: Advanced optical recognition eliminates manual digitising errors and saves hours of work.

VetiGraph CAD & Marker Suite

Pattern Design, Grading & Nesting

VetiGraph CAD Software: Complete toolset for professional pattern design, editing, and automated multi-size grading.

VetiGraph Marker Software: Intelligent automatic nesting engine to maximise fabric yield & minimise wastage.

Optimise material usage, reduce waste and improve cutting efficiency.

FastJet Twin-Head Production Plotter - plot width 182cm

MADE IN ENGLAND

High-speed twin-head inkjet production plotter designed for continuous printing of full-scale pattern layouts and cutting markers with ultra-sharp accuracy.

Ready to Upgrade Your Cutting Room?

Avoid long manufacturer lead times and substantial capital outlay. This complete system is ready for immediate inspection in Preston and fast deployment to your facility. Contact me today to arrange a live demonstration.
