

DESMA Elastomer Injection Molding Machine – Data Sheet

We are offering a high-quality DESMA elastomer injection molding machine from the proven 969 series for sale.

Technical Specifications

- **Manufacturer:** Klöckner DESMA Elastomertechnik
- **Model:** 969.250 Z (S3)
- **Machine Type:** Horizontal injection molding machine for elastomers
- **Clamping Force Class:** approx. 250 t
- **Injection Unit:** B500HP (High Pressure)
- **Control System:** 2030 TBM (modern touch interface / process monitoring)
- **Operating Hours:**
 - Hydraulic motor: 730 hours
 - Hydraulic pump (clamping unit): 65 hours
 - Operating system: active 3,360 hours
- **Year of Manufacture:** 2021

Applications

Ideal for the production of:

- Technical rubber molded parts
- Seals and O-rings
- Automotive and industrial components

Condition & Availability

- Machine is available at short notice
- Condition: very well maintained / regularly serviced
- Inspection possible upon request

Additional Information

- Documentation and, if applicable, accessories available upon request
- Support with dismantling, loading, and transport can be arranged
