

SKU : 470585

This series of hydraulic workshop presses with motor drive are designed with a stable portal with adjustable, open support table and are suitable for applications such as pressing in and out bearings, for assembly and straightening work or for testing workpieces. The laterally positionable working cylinder facilitates set-up without the workpiece having to be moved. These presses are almost indispensable in technical workshops and maintenance departments.

- Motorized hydraulic drive
- Horizontal piston travel
- Adjustable table height
- Set of prismatic blocks

TECHNICAL SPECS

WORKING AREA

Working width	1550 mm
Frame through-hole	550 mm
Pressure force	180 t
Operating pressure (max.)	400 bar
Stroke	400 mm
Forward motion speed	8 mm/s
Press speed	8 mm/s
Return speed	13.3 mm/s

DIMENSIONS

A	2850 mm
B	1200 mm
C	1390 mm
D	1550 mm
E	550 mm
F	2230 mm

DRIVE CAPACITY

Motor rating hydraulic pump	7.5 kW
-----------------------------	--------

MEASURES AND WEIGHTS

Hydraulic tank volume	22 l
Weight	2100 kg
Dimensions (L X W X H)	2230 mm x 1200 mm x 2850 mm

PRODUCT DETAILS

- Torsionally rigid welded gantry-style frame made of thick-walled sectional steel
- Heavy-duty design, intended for professional use
- Versatile for many kinds of repair and assembly work
- Finely adjustable press force for truing axles, supports, shafts, and much more
- Long piston stroke for removing and press-fitting bearings and bushings
- The operator can see the current working pressure on the gauge at all times.
- Motorized hydraulic unit for efficient operation
- Work cylinder with smooth horizontal adjustment for easier setup
- Premium components for guaranteed long-lasting reliable operation

Standard Equipment:

- Movable working cylinder
- Height-adjustable worktable
- Prism block set
- Pressure gauge
- Operator manual

KNUTH on YouTube Information to the point

On our YouTube channel you can find videos for nearly all machines from our program. We show the machines from current deliveries and you get an impression of the handling, the processing quality and the machining performance.
