

## **6 D – Brother RH-9820-02 Industrial Electronic Buttonhole Sewing Machine – Complete Workstation**

### Description:

For sale is a Brother industrial electronic buttonhole sewing machine, model RH-9820-02, offered as a complete workstation.

This machine is designed for automated buttonhole sewing in garment production. It features an electronic control system that enables consistent stitch quality and repeatable production results. The programmable control panel allows adjustment of sewing parameters and operation modes.

The machine has been used in a professional garment factory environment and was operational prior to factory shutdown. Its construction supports precise and efficient buttonhole production in continuous industrial use.

### Includes:

- Brother RH-9820-02 buttonhole sewing machine
- Electronic control panel (Brother RH-9820)
- Integrated motor
- Industrial worktable and steel stand with wheels
- Thread stand
- Foot pedal
- Pneumatic components

### Technical details:

- Manufacturer: Brother Industries, Ltd.
- Model: RH-9820-02
- Type: Electronic buttonhole sewing machine
- Programmable control interface
- Automatic sewing cycle functionality
- Pneumatic system integrated
