

## **2 B – H71 ASS Automated Industrial Sewing Workstation with Long Table – Complete Production Unit**

### **Description:**

For sale is an ASS automated industrial sewing workstation, supplied as a complete production unit with long table, pneumatic automation, and integrated control system.

The workstation has been used in a professional garment manufacturing environment and was operational prior to factory shutdown. It is designed for repetitive, high-precision sewing operations and significantly improves productivity and consistency compared to manual sewing setups.

### **Includes:**

- ASS automated sewing workstation
- Extra-long industrial sewing table
- Integrated ASS control cabinet
- Pneumatic system with hoses and actuators
- Thread stands and guides
- Industrial sewing head (installed)

### **Condition:**

Used industrial condition.

Operational prior to factory shutdown.

Serviced on 27.2.2026.

Sold as-is, where-is, without warranty.

Inspection possible prior to dismantling.

### **Typical applications:**

- Waistband sewing
- Long straight seams
- Hemming operations
- Garment assembly lines

### **Sales terms:**

This equipment is sold due to factory closure and is being liquidated directly from production use.

The buyer is responsible for verifying the condition and ensuring suitability for their own materials and production processes.

No claims will be accepted after the sale.

### **Location:**

Valga, Estonia

### **Removal & transport:**

Buyer responsible for dismantling and transport.
