

OSHIMA Industrial Conveyor Fusing Machine – Continuous Belt Type

Description:

For sale is an OSHIMA OP-450GS industrial conveyor fusing machine, designed for continuous heat bonding of interlining materials in garment production.

This compact industrial unit features a continuous belt system and digital control interface, allowing consistent and efficient fusing results. The machine has been used in a professional garment factory environment and is being sold due to factory closure.

Its design enables stable temperature and pressure control, making it suitable for repetitive production processes where uniform quality is required.

Includes:

- OSHIMA industrial fusing machine
- Integrated conveyor belt system
- Digital control panel
- Built-in heating system
- Safety guard cover
- Machine stand with working surface

Technical details:

- Manufacturer: OSHIMA
- Type: Continuous belt fusing press
- Voltage: 1P 220V
- Digital temperature control
- Adjustable pressure and speed

Condition:

Used industrial condition.

Operational prior to factory shutdown.

Sold as-is, where-is, without warranty.

Inspection possible prior to dismantling.

Typical applications:

- Interlining bonding
- Garment manufacturing
- Textile production
- Industrial apparel processing

Sales terms:

This equipment is sold due to factory closure and is being liquidated directly from production use.

The buyer is responsible for verifying the condition and ensuring suitability for their own materials and production processes.

No claims will be accepted after the sale.

Removal & transport:

Buyer responsible for dismantling and transport.

Location:
Valga, Estonia
