## EMCO EMCOMAT 14 D

EMCO EMCOMAT 14 D lathe with Emco digital display, built in 2006, in very good original condition. The machine was custom-built by a renowned German engineering company. CE compliant!

Technical data:

Year of manufacture 2006

### EMCO EMCOMAT 14 D

#### Technical data

##### Working range

Travel in X/Y/Z 135 / - / 590 mm

Center distance 650 mm

Center height 140 mm

##### Main spindle

Max. Speed 4000 rpm

Spindle connection Size 4 (DIN 55029)

Max. drive power 7.5 kW

##### Tailstock

Quill diameter 30 mm

Internal cone MK 2

Quill stroke 80 mm

##### Dimensions

Dimensions (LxWxH) 1280 x 730 x 1480 mm

Machine weight 420 kg

About the machine:

The EMCOMAT 14D is the smallest machine in the EMCOMAT series. The EMCOMAT 14D is a lathe for the highest demands: with infinitely variable speed control, constant cutting speed, and an impressive 7.5 kW drive power (40% duty cycle). This small but mighty machine can be found wherever high precision is required in a small space, e.g., in optical, electrical, and automotive workshops, in laboratories, and even in Formula 1

We are offering an EMCO EMCOMAT 14 D lathe with Emco digital display, built in 2006. This lathe is in very good original condition. It comes from a company where it was only used occasionally for special projects. Very easy to operate controls. The guides are regularly lubricated by the central lubrication system. We have tested the EMCO EMCOMAT 14 D mechanically and electrically. Take the opportunity to view and try out the EMCO EMCOMAT 14 D on site with power connected.
