Quotation and Specification PP melt-blown fabric extrusion line

General description:

- 1. Product size: PP melt blown fabric with width at 600mm (after trimming 17m*3)
- 2. Main Material: PP compounding material
- 3. Extruder type: SJ65/33 single screw extruder
- 4. Output capacity: 350-400kg/24hour
- 5. Electric power supply: 3phase, 380V;50Hz
- 6. Additional equipment:
- Vacuum feeder
- Raw material dryer
- Mesh manual filter
- T-mould for melt blown fabric
- Static electrical discharge equipment
- Belt type forming 850mm
- Collecting device
- Winder and slitting

Content list

Equipment components:

- (1) Vacuum loader and hopper dryer
- (2) SJ65/33 single screw extruder
- (3) Heating oven for hot air
- (4) Extrusion T-mold
- (5) Forming device
- (6) Winder &slitting system
- (7) oil free air compressor

(1) Automatic vacuum loader and hopper dryer---1 set

| N | 0 | Description | Unit | ZJ-400 |
|-----------|-------------|-----------------------------|--------------|--------|
| Uses: fee | ding PP mat | erial into extrusion machin | ne | |
| 1 | Transfer me | ethod | Vacuum sucti | on |
| 2 | Vacuum loa | ader power | 0.75kw | |
| 3 | Heating por | we | 6kw | |
| 4 | Capacity | | 100 Kg/h | |

(2) SJ65/33 single screw extruder

| Contorn | Diameter(mm) | 65mm |
|------------------------|--------------------------------------|---|
| Screw | L/D | 33/1 |
| | Screw Rotating speed | 30-60 |
| | (r/min) | |
| | Material | 38CrMoAlA, Nitrogen treated |
| | Heating | Ceramic heating heater with stainless steel outer cover |
| | Heating segments | 6 heating zone on barrel |
| | Heating power | 18kw |
| | Barrel type | With feeding groove; Water cooling inlet orifice |
| | Cooling ways on barrel | Air Cooling by blower, |
| Barrel | | temperature control accuracy: ±2°C |
| | Cooling segment | 6 air cooling segments |
| | Material of screw barrel | 38CrMoAlA, Nitrogen treated |
| | Main motor power (KW) | 22kw |
| Transmission system | Speed adjusting mode of main motor | ABB/Siemens frequency conversion |
| | Rotating speed of main motor (r/min) | 1500r/min |
| | Gear box | Hard tooth face Shaft: NSK |
| | | of Japan Material of gear: |
| | | 20CrMnTi |

(3) Heating oven for compressing air

| Item | Description | Description Remarks | |
|------|--------------------------|---|--|
| | | | |
| 1 | Heating Power | 40kw | |
| 2 | Material of air drums | Stainless steel 304 | |
| 3 | Temperature control ways | Automatic control by temperature controller | |
| 4 | Material of heater | Made by high quality 316 stainless steel | |

| Item | Description | Unit | remarks |
|------|-----------------------|------------|--------------------|
| | | | |
| 1 | Heating Power | *KW | |
| 2 | Material of Mold body | SUS630,Ja | apan |
| 3 | Material of heater | High quali | ty aluminum heater |
| 4 | Width of mold | 600mm | |

(5) Belt type forming and collecting device

| Item | Description | Remarks |
|------|-------------------------------|----------------------------------|
| | | |
| 1 | Mesh belt width | 800mm |
| 2 | Motor power | 0.75kwspeed control by inverter |
| 3 | Suction fan for cooling | 4kwspeed control by inverter |
| 4 | Main frame material | Aluminum alloy |
| 5 | With suction fan to make melt | blown fabric surface more smooth |

Static electric equipment

Main purpose: to insert the static electric on PP melt blown cloth

Input current : 0—100UA

Working voltage : 220V+10% 50HZ/60HZ

Working temperature : -15°C ~ 50°C

Static electric high voltage generator :120KV

Working width:800mm

Maximum power consumption : 40W

(6) Winder and slitting system

| (*) ********** | - Shirtening System | |
|----------------|---------------------|---------|
| Item | Description | Remarks |
| | | |

| | ***** 1 | 1 61 | |
|---|-----------------------------|----------------------------------|--|
| 1 | Winder power | 1.5kw | |
| 2 | Max. winding width | 800mm | |
| 3 | Online slitting power | By alloy material blade | |
| 4 | Shaft material | Aluminum alloy | |
| 5 | Speed control | By inverter | |
| 6 | With electrode processing d | With electrode processing device | |

(7) air compressor

| Item | Description | Unit | Remarks |
|------|-------------|------|---------|
| | | | |

This machine mainly used for wrapping packing the corrugated pipe with plastic film

| PART B : AIR DRYER | | | |
|--------------------|------------------|--------|-------------------------|
| 6 | Noise | / | Silent type |
| 5 | Control ways | / | By inverter |
| 4 | Capacity | m³/min | 5 |
| 3 | Working pressure | Мра | 0.8 |
| 2 | Working ways | / | Screw type and oil free |
| 1 | Motor power | kw | 30kw |

| 1 | Processing Capacity | m3/min | 3.0 |
|---|---------------------|--------|---------------|
| 2 | Power capacity | HP | 50HP |
| 3 | Working pressure | Мра | 0.4Mpa-0.5Mpa |
| 1 | Volume | m3 | 1.5 |
| 2 | Size | mm | 2274*850mm |
| 1 | Processing Capacity | m3/min | 3.0 |

(8) Oven for clean the mold

| Item | Description | Remarks |
|------|-------------|---------|
| | | |

| 1 | Oven power | 6kw |
|---|--------------------------|---------------------|
| 2 | Material of heating oven | Stainless steel 304 |
| 3 | Working temperature | 500degree |
| 4 | Inner dimension | 45*55*55cm |
| 5 | Working voltage | 220V |
