

**BTS-Plastic Foil Compactor**

The BTS-Plastic Foil Compactor is the solution to keep large bulky packaging film under control. With its space-saving footprint and secure stand you can easily reduce all foil waste to a minimum of volume. The retaining ring in the plastic foil compactor prevents annoying expansion so that the foils stay where they belong. The filled bags can be baled by using a waste baler or disposed of in a recycling bin. By collecting and compacting this valuable and recyclable material you achieve a volume reduction of up to 90%, a significant saving on your disposal costs and you properly return the material back into the recycling cycle.

Foil Compactor size: 1000 H x 450 W x 420 D mm  
Foil Compactor weight: 5.5 kg  
Foil Compactor colour: RAL 9006 silver

Foil Compactor Bag volume: 240 Ltr.  
Foil Compactor Bag weight capacity: up to 15 kg

- Easy collecting the packaging films
- Clean and safe working environment
- Retaining ring prevents the annoying material expansion of the foils
