SPECIAL MACHINE for 2-sided parallel trimming

01 LASER LIGHT

for accurate lateral alignment of boards for manual feeding,
mounted on adjustable brackets at the inlet of the milling machine Pos. 02
The adjustment is done manually and is easy to install and accessible.
Electrical equipment in 230 volts

02 MILLING MACHINE

For double-sided, lateral cutting by means of 2 x 2 milling units
The chip removal can be up to 50 mm per side.
Steel welded construction with 2 driven 3-fold chains. (proven technology)
The machine head is height adjustable and with 3 ST. Equipped tires.
Feed 3.5 kW electronically controlled.

Milling units 7.5 kW

Milling machine right 2 ST and milling machine left 2 ST, width adjustable and on heavy steel
Welded construction mounted horizontally.
The motors can be individually adjusted back-to-back, the dimensions are displayed via scales.
Shavings Hoods Down and Shaving Protectors Up.
Motors with special shaft for holding chipper tools

Machining tools: Chipper tools in special construction

Electrical equipment: 400 Volt 50 Hz

Electric power: 33.50 kW

Dimensions in mm: length 1,000 x width 2,000 x height 1,800 / weight: 1,200 kg

Chip extraction nozzle: 2 ST, each with a diameter of 180 mm

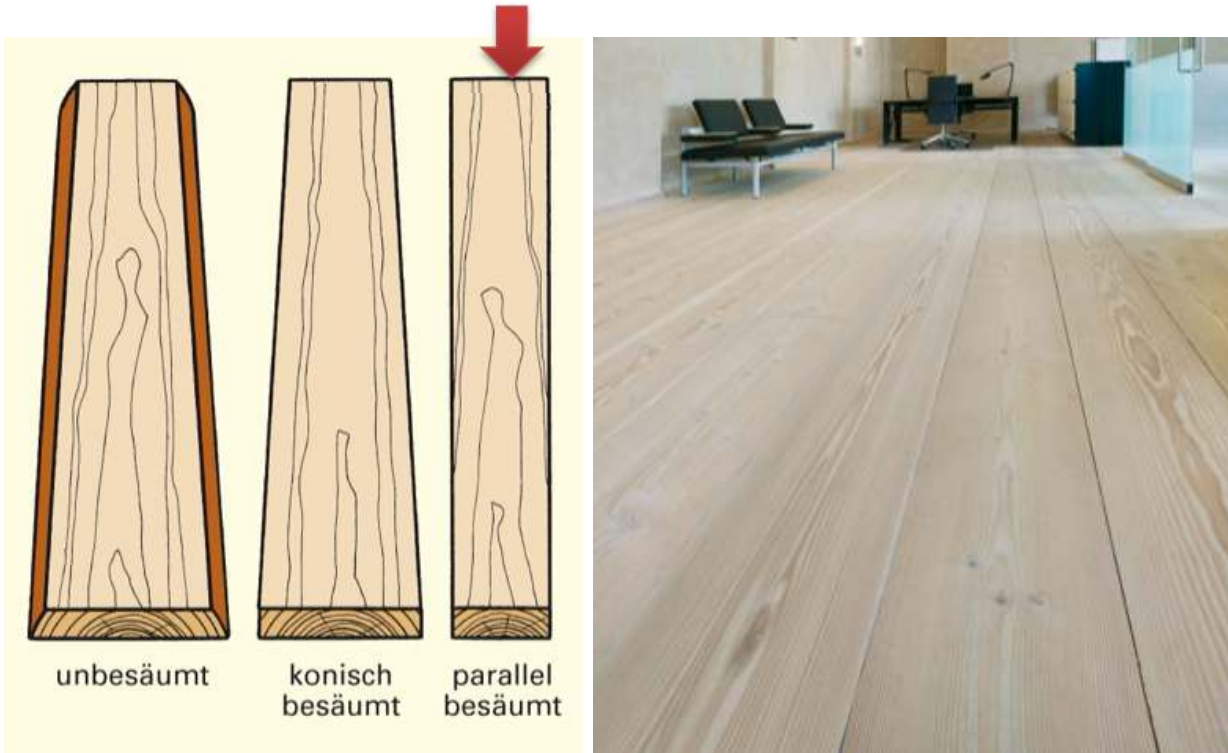

Painting machine: RAL 7035 LIGHT GRAY, 2K-structured varnish on pure / acrylic resin basis

Protective device: RAL 2000 GELBORANGE, 2K structural varnish based on pure / acrylic resin
