## Modular biomass boiler house 40kW

**Ready 40 kW modular boiler house in an ISO container – designed for fast installation and immediate operation.**

Suitable for heating buildings, construction sites, workshops, warehouses, and temporary facilities, as well as for backup or emergency heating when fast deployment is required.

The module is built on an ISO shipping container base (approx. 2.4 × 6.1 × 2.55 m, weight ~4700 kg). Power supply: 3N+PE 230/400 V, 50 Hz (~5 kW). The boiler house complies with CE requirements and has undergone conformity assessment by TÜV NORD.

### The boiler house module is equipped with:

- DEFRO pellet boiler with automated fuel feeding (40 kW)
- Domestic hot water tank by Kospel (approx. 140 L)
- Hot water buffer tank by DEFRO (approx. 800 L)
- Expansion vessel for the heating system
- Circulation pumps
- Control and automation system with electrical distribution cabinet
- Natural ventilation and flue gas exhaust system

For additional safety, the module is equipped with a gas fire suppression system.

The module is available for both purchase and rental. The rental option includes full service – boiler house maintenance, pellet supply and delivery, operational monitoring, and technical support, ensuring hassle-free operation for the client. **Rental price: €1,900 per month.**

# €43,500

The current system configuration allows for an increase in boiler capacity.
