overall dimensions:

Total length 18.70 meters without ribbons

Useful belt length axis by axis: 18.45 m

Useful net width 2.00 m.

Overall width of the machine body 2.36 m

Overall width including trays 2.36 m + 0.65 m total 3.01 m

Total useful area of the machine sq.m. 36.90

Height 1400

Features by section

Sterilization length: mm. 7,700 useful

Pre-cooling length: mm. 3,300 useful

Length of warm water cooling + cooling: mm. 7,000 useful

Height mm 1400

Single track entry belt width: mm 200

Length: mm 3200

Single lane outfeed belt with Intralox belt width: mm 400

length: mm 3700 useful

Tecnoindustria Used Pasteurizer Completely Overhauled, The machine is totally overhauled, in excellent condition.

It is necessary to build the electrical panel, this is missing in this equipment.

Its construction is therefore carried out and created with the customer's specifications, adapting the pasteurization areas to the production needs.

Its speed on the 65 diameter is approximately 18,000 pieces per hour, speaking of cylindrical containers.

This used tunnel pasteurizer is ideal for both tomato preserve jars and for tinfoil and aluminum cans.

Both fruit juices and soft drinks and even tomato puree can be pasteurized.

The used tunnel pasteurizer has already been overhauled and is ready to be purchased and delivered to the end customer, we will follow all the issues related to its loading on trucks or containers included in the price.
