Services for pasteurizer equipment for sell:

We also offer the machinery reinstallation service at your company if you need it.
We will create a dedicated offer if you wish, only after receiving all the necessary information.
Upon request, we can also modulate the control panel and intervene on the machine's PLC.
This is used to customize the functionality of the used pasteurizer for sale.

If requested, we also provide the packing service if the goods are destined abroad and with transport by ship.
One of our team of technicians will be at your service and will create a tailor-made project for your company.

We have many solutions available for this pasteurizer equipment for sell, contact us at the numbers on the site for more information and to receive a quote for one of our used bottling machines.

Additional information:

For this pasteurizer equipment for sell it is necessary to build the electrical panel, this is missing in this equipment.
Its construction is therefore carried out and created with the customer's specifications, adapting the pasteurization areas to the production needs.
Its speed on the 65 diameter is approximately 18,000 pieces per hour, speaking of cylindrical containers.
This used tunnel pasteurizer is ideal for both tomato preserve jars and for tinsplate and aluminum cans.
Both fruit juices and soft drinks and even tomato puree can be pasteurized.

The used tunnel pasteurizer has already been overhauled and is ready to be purchased and delivered to the end customer, we will follow all the issues related to its loading on trucks or containers included in the price.
