Description

Used capsuling equipment Nortan Prisma 4T 6000 bph

This used capsuling equipment was rebuilt in 2013 as a new, and shrink-wrap capsule type.

Safeguards are available for this Used rotary capsuling machine

There are three different sets of bottle equipment available.

The machine has been checked before dismantling. It is in good working condition and has been in operation until September 2021.

It has automatic storage for the shrink capsules.

A photocell connects the components to the main structure, which releases capsules for incoming bottles, completely automatically and synchronized.

Despite its simplicity, maintenance is very important for this capsuling machine. The thermal heads and their gaskets, need to be checked carefully.

The electrical panel is in order and complete with all cables and PLC, manuals, and wiring diagrams.

The floor space required for this used capsuling machine square meters 4,50.

Max. speed is 6,000 b\h.

The Used rotary capsuling machine, has a whole set of stars, augers, and counter-stars to convey the bottle correctly. The direction of entry is from left to right and therefore clockwise.

This machine is specific for glass containers. It can handle formats ranging from 0.50 L, to 0.75 L up to the size of 1 L.

Nortan is one of the most common brands in circulation, it is therefore easy to find any spare parts for the machine.
