

Brother BAS-326G-01A Programmable Pattern Sewing Machine with Programming Device – Complete Workstation

High-Precision Electronic Pattern Sewing System for Automated Garment Production

The Brother BAS-326G-01A is a professional programmable pattern sewing machine designed for automated sewing operations requiring high precision, repeatability and production efficiency.

This machine combines an electronically controlled X-Y sewing system, pneumatic workpiece clamping and programmable pattern control. It is particularly suitable for repetitive sewing operations where consistent positioning and identical stitch quality are essential.

A major advantage of this unit is the included separate Brother programming device, allowing sewing patterns and machine functions to be programmed and managed directly at the workstation.

The machine was used in professional denim production at the former MASI JEANS factory and remained operational until factory shutdown.

Technical Specifications

Manufacturer: Brother Industries Ltd.

Model: BAS-326G-01A

Machine Type: Programmable Pattern Sewing Machine

Country of Manufacture: Japan

Year: 2006

Sewing Area: 220 × 100 mm

Material Clamping: Pneumatic

Feed System: Electronic X-Y controlled intermittent feed

Control: Electronic programmable pattern control

External compressed air supply required

Factory Reference: V261

Key Features

- Programmable automatic pattern sewing
- Electronic X-Y workpiece positioning
- Pneumatic material clamping
- Automatic thread trimming
- Pattern scaling and speed adjustment
- Programmable sewing pattern memory
- Separate Brother programming device included
- Electronic operator control panel
- Dual foot-pedal operation
- Heavy-duty industrial construction
- Complete production workstation

Includes

- Brother BAS-326G-01A sewing machine
- Brother electronic control system
- Separate Brother programming device / handheld programmer
- Electronic operator control panel

- X-Y sewing and positioning system
- Pneumatic clamping system
- Industrial sewing table
- Heavy-duty steel stand with wheels
- Dual foot pedals
- Thread stand
- Work light

Applications

- Pocket attachment and reinforcement
- Decorative pocket stitching
- Bartacking and reinforcement patterns
- Label and patch attachment
- Emblem sewing
- Denim and jeans production
- Workwear manufacturing
- Uniform production
- Technical garments
- Automated repetitive sewing operations

Condition

Previously used in professional garment production.

Fully operational prior to factory shutdown.

Good overall industrial condition with normal cosmetic wear consistent with professional factory use.

Supplied as a complete workstation including the separate Brother programming device.

Available for inspection before dismantling.

Location

Valga, Estonia

Dismantling & Transport

Buyer is responsible for dismantling, loading and transportation.

Sales Terms

Sold as-is, where-is, without warranty.

Part of the MASI JEANS factory liquidation.
