

Jung JF 520

Jung JF 520 Surface Grinder, built in 1989 / 2019, mechanically overhauled, in very good original condition
The machine comes from the technical center of a renowned German die-casting company.

Technical Specifications:

Year of manufacture: 1989 / 2019

Technical Specifications

Clamping surface (L x W in mm) 600 x 200

Grindable Area (L x W in mm) 600 x 250

Max. Magnet Size mm 500 x 200

Max. Grinding Wheel Dimensions mm 225 (250) x 25 x 51

Distance from Table to Spindle Center mm Max. 400

Table longitudinal feed (reciprocating) m/min 1 – 20

Creep speed mm/min 0 – 500

Grinding spindle drive speed rpm 800 – 4200

Power kW (with creep speed) 1.6 – 2.2

Machine weight approx.: 2.0 t

Accessories and equipment:

Magnet

Coolant system

Machine feet

Grinding wheel

About the machine:

We are offering a Jung JF 520 surface grinder, built in 1989 / 2019, in very good condition. The machine is, of course, fully operational and has approximately 250 operating hours since its overhaul. The slides all run very smoothly and evenly. Even at high speeds, the Jung runs very quietly. This newer generation of surface grinders is very user-friendly and can produce surfaces with a low Rz value. Take this opportunity to view the machine on-site while it's running and see its condition for yourself.
