

#### Gluing unit

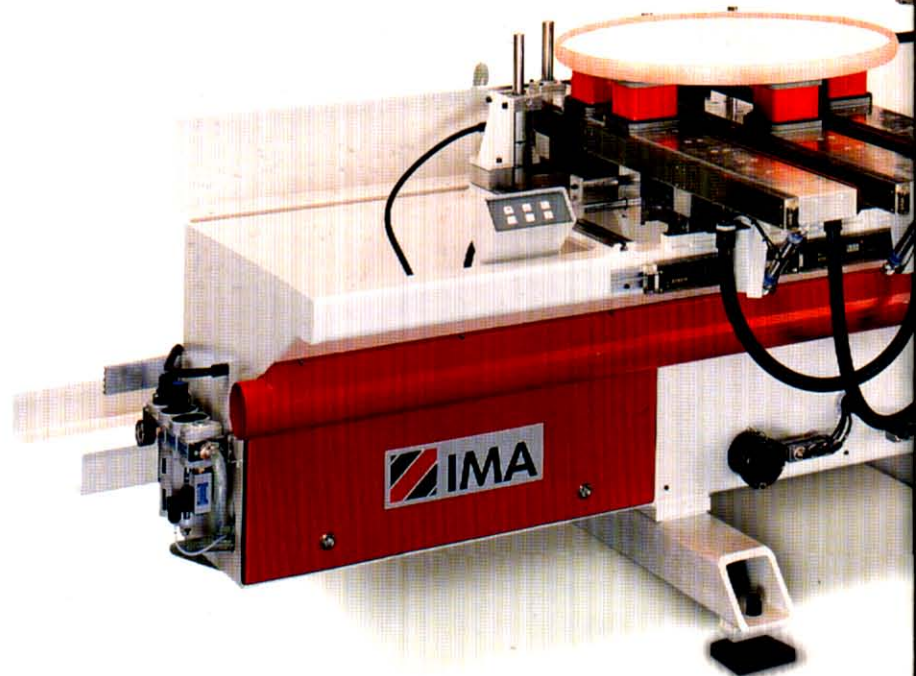

The gluing unit patented by IMA makes creative design ideas possible at an economic level

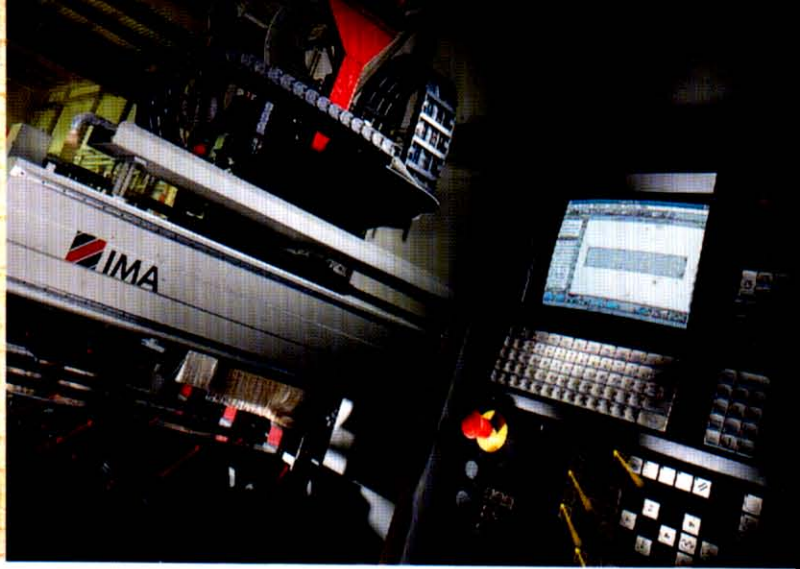

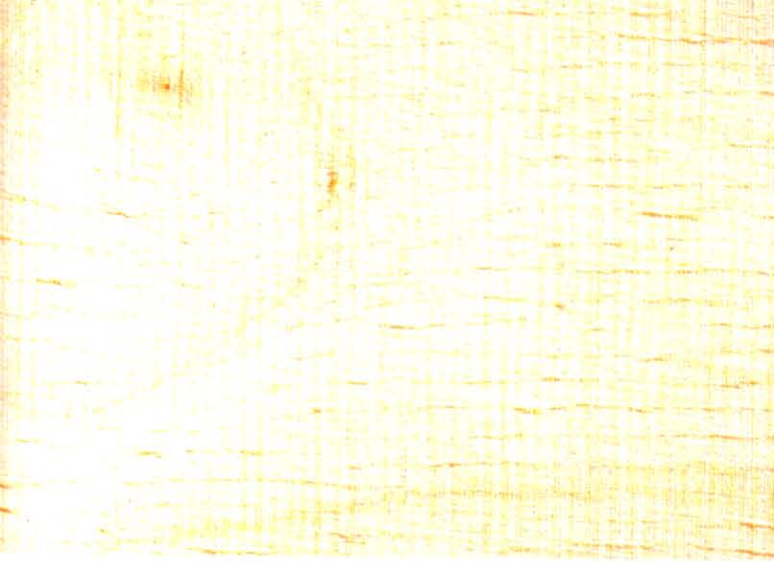

#### Machine details

Heavy construction for heavy chip removal tasks – even the guides take this principle into account

## Versatility is its strength

**CNC at the leading edge of technology:** the BIMA 410 offers perfected complete processing of a work piece in one setting and is especially impressive due to the built-in edge banding facility. Its wide variety of options, made possible due to modular design, makes the BIMA 410 a truly multi-talented performer that can be used for a wide range of applications and can be set up optimally for all work tasks and customer wishes.

#### Controller

IMAWOP – more than just a controller.  
It carries out data processing within the  
machine and provides precise control  
together with the IMATRONIC CNC
