Used capping machine BERTOLASO Aluminium screw up to 1200 bph

Machine type:	Capping Machine
Ref:	TP108
Model:	VB 40 V 220 / 50
Year:	1991
Condition:	Ready for Operation
Price:	€ 17,800
Formats:	750 ml

Technical details

No. of heads:	1	Cap size:	30 x 60 mm
Rotation direction:	Clockwise	Cap type:	Aluminum screw
Safety features:	Yes	Manuals:	No
Width:	900 mm	Length:	1200 mm
Height:	1200 mm	Weight:	500 kg

Description

Used capping machine BERTOLASO Aluminium screw up to 1200 bph

The Bertolaso aluminium capper clearly meets the needs of bottling with aluminum caps. Moreover, technicians overhauled this model in 2008 and adapted it for Stelvin capping, thereby ensuring reliability and versatility.

Technical specifications

The machine effectively uses one capping head to operate with aluminum screw caps. Furthermore, the system performs a clockwise rotational movement to ensure a uniform and precise capping process. Consequently, it processes 1200 bottles per hour, making it an ideal solution for small and medium productions.

The compact dimensions of the machine, measuring 1200 mm in length, 900 mm in width, and 1200 mm in height, therefore enable easy integration into existing production lines. Additionally, its weight of 500 kg provides a stable and durable structure suitable for intensive use.

Safety and maintenance

Integrated safety features undoubtedly protect operators during use. Thus, these systems keep the machine compliant with modern industrial safety standards. Besides, the modular design and availability of original Bertolaso components simplify regular maintenance.

Efficiency and adaptability

This machine, ready for use, optimizes production times while maintaining a high level of capping precision. Moreover, the adaptation for Stelvin caps satisfies current market demands and, as a result, offers greater flexibility compared to the original model.

Applications

The Bertolaso screw capping machine efficiently serves various industrial sectors, including wine, food, and beverage industries. Consequently, its versatility and high performance provide an optimal choice for companies requiring a reliable and efficient machine for aluminum cap closures.

Conclusion

The VB 40 V 220 / 50 model delivers robustness, efficiency, and safety. Furthermore, it caps 1200 bottles per hour and adapts for Stelvin capping, thus making it a highly competitive solution for companies of various sizes. Consequently, Bertolaso reliability and compliance with safety standards make this machine a valuable investment in the bottling sector.
