

Technical Data FiberFlow F50

Height	1250mm ± 50mm
Width	620mm
Depth	800mm
Height centre of product channel (height at screw tip)	1080 mm ± 50 mm
Weight of entire flat cooling die unit	220 kg
Seal material (FDA-compliant)	EPDM
Maximum permitted pressure in the connecting segment	35 bars
Maximum permitted product pressure in the flat cooling die segment	35 bars
Maximum permitted pressure in the flat cooling die's cooling jacket	10 bars
Product throughput	50 kg/h
Flat cooling die's cross-section area	750 mm ²
Maximum permitted extruder mass temperature upon entering die insert	130°C
