

Ultrasonic cleaning with patented technology

DCM Ultrasonic's DL range offers an advanced and effective solution for ultrasonic cleaning in industrial and technical environments requiring standardized processes. This equipment has been designed to meet the demands of deep, gentle, and uniform cleaning, even in the most complex geometries.

Main Features

- Drain (for easy emptying).
- Hinged lid (for models with a capacity of 100 to 750 liters) and pistons (for models over 750 liters).
- Thermal and acoustic insulation.
- Electric heating system.
- Non-slip, height-adjustable feet.
- Made of AISI 304 stainless steel.
- Ultrasonic frequency of 28 kHz and 40 kHz.
- Cleaning machines with capacities from 100 to 12,000 liters.
- Intuitive digital display for easy machine control.

Cleaning for:

Degreasing - Stripping - Parts Maintenance
Descaling - Industrial Cleaning - Disinfection
