PREMIUM WOOD PELLET PRODUCTION PLANT

Complete, compact industrial line | Approx. 3 t/h | CPM pellet mill | 2018 | Location: Sweden

ASKING PRICE

EUR 749,000

Complete equipment package

Turn-key equipment package for premium wood pellet production.
A highly compact plant layout combining material preparation, pelletizing, cooling, screening, dust extraction, storage, conveying and integrated automation. The line can be inspected **fully operational until the end of November 2026**.

Approx. 3,000 kg/h	Nominal output
Approx. 6,000 t	Reported lifetime production
2018	Installation
Dry wood sawdust	Raw material

MAIN EQUIPMENT

- **CPM Europe pellet mill** - Model 7730-4, 200 kW ring-die pellet press
- **CPM Champion hammer mill** - 11.5 x 54, 90 kW
- **Mogensen G0514** industrial screening equipment
- **Industrial pellet cooler** integrated into the line
- **Simatek** dust filtration, extraction fans and ductwork
- **MAFA** finished-pellet silo and dry sawdust storage silos
- **Siemens SIMATIC / ABB** PLC-HMI automation, frequency converters and electrical cabinets
- **Conveying system** - screws, feeders, rotary valves, pneumatic transfer, platforms and steel structures

FLEXIBLE PURCHASE OPTION

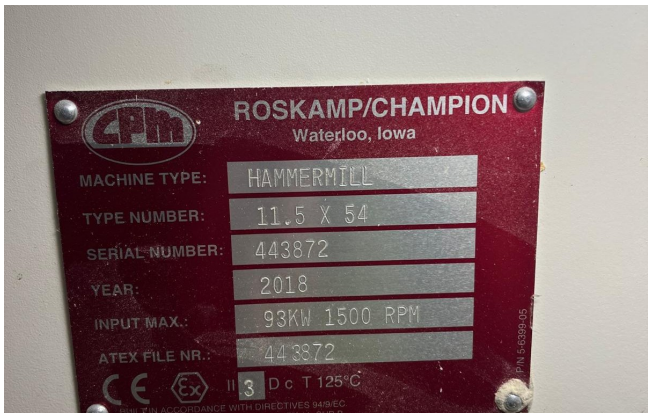

The plant can also be purchased without the storage silos. Scope and price can be discussed depending on the buyer's required configuration.

COMPACT. DOCUMENTED. READY TO INSPECT.

A strong opportunity for a buyer looking for a complete pellet production line with a compact footprint and established industrial equipment.

Pelletizing / process equipment

CPM Champion hammer mill - 90 kW

Simatek dust filtration

Storage silos

CPM PELLET MILL - INSPECTED CONDITION

The CPM pellet press has a **documented technical issue inspected by official CPM representatives**. The CPM inspection identified excessive gearbox bearing clearance and insufficient gear backlash. According to the inspection, the gear set remains in good condition; service with replacement of gearbox bearings and seals was recommended. The official CPM inspection report is available to serious buyers.

DOCUMENTATION & VIEWING

The sale includes extensive technical documentation, operating instructions, plant drawings and editable **DWG/CAD files**, supporting dismantling, transport and reinstallation. The plant is available for inspection **in full operation until the end of November 2026**. Viewing by appointment.
