TMG reg. nr. 268**

Characteristics:

- The diameter of the clamping plate: 600mm
- The diameter maxim of the workpiece clamping: 1000mm
- The lenght maxim of the workpiece: 5500mm

Amplasment Dimension:

- WxDxH = (12000+ 1500)x3200x2400mm
- Weight = aprox. 25000KG

Additional Information

- the maximum grinding diameter valid for long parts of approx. 500mm = 1000mm
- for longer pieces, the maximum diameter is limited by the need to use the support frames = 600mm
- for internal rectification of long parts, the grinding spindle bar included in the machine is used as various accessories: 2 pieces of 1200mm 1 piece of 700mm
- for rectification over short distances, the machine is equipped with 3 other rectification pins with lengths of approx. 350mm
- the table of the rectification support allows an inclination of max. 10 degrees for grinding conical surfaces
