

Uhlmann Serialization Platform

The Uhlmann Serialization Platform is a compact, standalone unit with fully automated format adjustment. The modular platform, incorporating modules for printing, inspection, tamper-evident labeling, checkweighing, and top labeling, is ideal to meet current serialization requirements.

Uhlmann Serialization Platform – ideal to meet current serialization requirements

Benefits at a glance

- Perfect retrofit solution: existing packaging lines – whether from Uhlmann or other suppliers – can be made fit for serialization avoiding longer downtimes
- Modular design allows extension at all times
- Fast, straightforward, and fully automated format adjustment
- GMP-compliant machine design for easy maintenance and cleaning
- Uhlmann TouchControl HMI: one operating panel for all functions – including camera and printer
