

Transmatic TS 5 PA Industrial Pneumatic Heat Transfer Press (2019)

Professional Swing-Away Heat Transfer Press for Hotfix Rhinestones, Decorative Stone Application & Textile Branding

The Transmatic TS 5 PA is a premium industrial pneumatic heat transfer press manufactured by Transmatic S.r.l., Italy, designed for continuous, high-volume garment decoration and textile finishing.

This machine was used in the former MASI JEANS factory for applying hotfix rhinestones, decorative crystals, heat-applied embellishments, logos and transfers to denim garments and fashion apparel. Its pneumatic operation provides consistent pressure across every pressing cycle, ensuring repeatable production quality while minimizing operator fatigue.

One of the machine's strongest selling points is its exceptionally low usage. The integrated production counter currently displays only 1,498 completed pressing cycles, indicating very light industrial use for a machine manufactured in 2019.

The machine is supplied as a complete professional workstation and includes interchangeable lower platens, allowing fast changeovers for different garment sizes and applications.

Technical Specifications

Manufacturer: Transmatic S.r.l. (Italy)

Model: TS 5 PA

Serial Number: 26488

Year of Manufacture: 2019

Voltage: 230 V

Power: 2.2 kW

Operation: Pneumatic (external compressed air required)

Control System: Digital colour touchscreen

Heating Control: Electronic temperature and time control

Pressure Adjustment: Integrated pneumatic regulator with pressure gauge

Safety: Emergency stop button and CE certified

Included Equipment

- Complete Transmatic TS 5 PA heat transfer press
- Digital touchscreen control system
- Standard lower platen
- Additional interchangeable small platen for sleeves, pockets, labels and small logos
- Integrated pneumatic pressure regulator
- Work light
- Complete workstation

Key Features

- Premium Italian industrial quality
- Designed for continuous production environments

- Previously used for applying hotfix rhinestones and decorative stones to denim garments
- Pneumatic automatic closing system for perfectly repeatable pressure
- Swing-away upper platen for safe, ergonomic operation
- Digital touchscreen with programmable temperature, pressing time and production counter
- Exceptionally low recorded usage of only 1,498 pressing cycles
- Fast changeover using interchangeable lower platens
- Heavy-duty industrial construction for long service life
- Excellent choice for garment manufacturers, decorators and textile finishing companies

Typical Applications

- Hotfix rhinestone application
- Crystal and decorative stone application
- Fashion garment embellishment
- Denim decoration
- Heat transfer printing
- DTF transfers
- Vinyl heat transfers
- Logo application
- Patch attachment
- Label application
- Sportswear production
- Workwear branding
- Promotional apparel
- Textile finishing

Condition

Previously used in professional garment manufacturing.

The machine powered a dedicated production process for garment decoration until the closure of the MASI JEANS factory.

The digital touchscreen controller powers on and operates normally, and the production counter displays only 1,498 completed cycles.

Overall cosmetic condition is very good with only minor signs of normal industrial use.

Inspection is welcome prior to purchase.

Location

Valga, Estonia

Dismantling & Transport

Buyer is responsible for dismantling, loading and transportation.

Sales Terms

Sold as-is, where-is, without warranty.

Part of the MASI JEANS factory liquidation.
