

Vacuum pump

TAWI vacuum pumps are designed with three key features in mind; performance, reliability and sustainability. The direct driven pump minimizes friction and unnecessary wear.

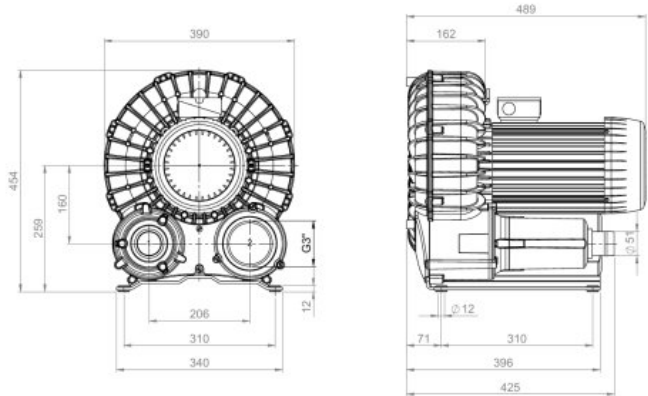

New high performance vacuum pump from TAWI.

TAWI vacuum pump large

This large model is a reliable vacuum pump ideal for vacuum lifters VM60-270 [VM160-300].* When you need to lift heavy, this pump will ensure safe operations with minimal wear and optimal durability. The direct driven pump helps reduce friction and wear, ensuring long term high performance with minimal downtime in your operations.

* TAWI vacuum lifters have new model names from March 2018, old names in brackets.

Side channel blower

- double staged, air cooled
- with energy efficient motor (IE3)
- reduced risk of overheating
- silencing hood available
