

For Sale:
Labu 5/10 HL Brewhouse (2017) +
4 Uni-Tanks of 12HL + all supporting equipment

This high-end Austrian Brewery was newly purchased in **2017** directly from the owner. It has been used less than 100 times ever since because it is positioned at a remote location away from the main brewery. It has been maintained very well.

It is 5HL machine but can do 2 brews simultaneously, so effectively it can be considered a 10HL machine.

It has 4 Uni-tanks of 12 HL and all the necessary equipment, such as cooling, to make it a turn-key brew installation of a premium quality. Also all necessary hoses plus a mobile pump for CIP of the Unitanks, etc. Original documentation available, in German, showing that all equipment was purchased at the Labu factory.

This whole set would currently cost approx. 240.000€ (ex VAT, ex works). Delivery possible per January 2023, we could provide a proper instruction / training by one of our senior brewers.

Current asking price is 135.000€, ex VAT ex work but including instruction. The brewery is located in the Amsterdam area, the Netherlands

For more information, please contact Paul Riteco, paul@brouwerijhoop.nl or by phone: +31 653788723
