

Tonello 330 HS Industrial Garment Washing & Dyeing Machine (re-controlled 2014)

Large-Capacity 3300 L Industrial Garment Wet-Processing Machine with B&R Touchscreen Control

The Tonello 330 HS is a large-capacity industrial garment washing and wet-processing machine manufactured by Tonello S.r.l. (Sarcedo, Italy), the leading garment-finishing technology brand. The 330 class (3300 L drum) handles industrial washing, dyeing, softening, bleaching and stone-wash / enzyme effects on denim and garments at production scale.

This unit (MASI in-house reference "Pesumasin No 3") was in professional denim-finishing production until factory shutdown. The machine body dates from 2000 and the complete electrical control system was rebuilt in 2014 with a new Tonello / B&R panel.

Technical Specifications

- Manufacturer: Tonello S.r.l. (Italy)
- Model: G1 330 HS
- Serial / Matricola: 1407
- Year: machine 2000 / electrical control rebuilt 2014
- Basket / Drum Volume: 3300 L
- Power Supply: 380–400 V, 3-phase + GND, 50 Hz
- Installed Power: 27 kW (machine plate) / 14 kW (2014 control plate)
- Air Pressure: 7 bar · Max Steam Pressure: 3 bar · Hydraulic Pressure: 10 bar
- Weight: 10,000 kg
- Supply Cable: 25 mm²
- Country of Manufacture: Italy

Key Features

- Large 3300 L stainless drum for high-capacity garment wet processing
- B&R Power Panel 300 touchscreen HMI (rebuilt 2014) with programmable cycles
- Yaskawa Varispeed 616G5 variable-frequency drum drive
- Mettler Toledo weighing controller and Siemens Sitrans flow metering
- Automatic chemical dosing system
- Steam, water, air and hydraulic services
- Front loading door with sight glass

Includes

- Tonello 330 HS washing machine with stainless drum
- B&R touchscreen control cabinet and pushbutton console
- Yaskawa VFD and PLC electrical cabinet
- Chemical dosing system, pumps and instrumentation

Applications

- Industrial denim and garment washing
- Garment dyeing and over-dyeing

- Softening, bleaching, enzyme and stone-wash effects
- High-volume garment wet processing

Condition

- Working — main machine functional (per factory records)
- Video recorded 19.3.2026
- Previously in professional denim-finishing production (MASI "Pesumasin No 2")
- Machine from 2000 with 2014 electrical-control rebuild
- Typical wear/dust from a wet-processing environment
- Available for inspection under working conditions before dismantling

Location

Valga, Estonia

Dismantling & Transport

Buyer responsible for dismantling, loading, transportation.

Sales Terms

Sold as-is, where-is, without warranty.

Part of the MASI Jeans factory liquidation. Part of the Tonello industrial laundry line (available individually or as a complete line).
