

VEIT BRISAY BRI-2390/211 Industrial Garment Ironing Press (2011)

Professional Pneumatic Steam Ironing Press for Trousers, Denim & Garment Finishing

The VEIT BRISAY BRI-2390/211 is a premium German-built industrial ironing press designed for high-quality garment finishing in demanding production environments. Manufactured by BRISAY Maschinen GmbH, part of the renowned VEIT Group, this machine combines pneumatic operation with steam-heated pressing technology to deliver consistent, professional pressing results.

This machine was used in the former MASI JEANS factory for finishing denim garments and trousers before shipment. It remained in daily production until the factory closure and represents an excellent opportunity for garment manufacturers, laundries, textile finishing companies, or industrial pressing operations.

The ergonomically designed foot-pedal operation allows fast, repeatable production while reducing operator fatigue. The shaped upper and lower bucks make the machine particularly suitable for pressing trouser tops, waist areas and similarly contoured garment sections.

Technical Specifications

Manufacturer: BRISAY Maschinen GmbH (VEIT Group), Germany

Model: BRI-2390/211

Modification: 026

Machine Number: 9128

Year of Manufacture: 2011

Power Supply: 230 V, 50–60 Hz

Electrical Power: 0.15 kW

Current: 0.7 A

Compressed Air: 0.6 MPa

Steam Pressure: 0.45–0.60 MPa

Condensate Pressure: Max. 0.05 MPa

Weight: 320 kg

Certification: CE marked

Key Features

- Premium German industrial quality from VEIT Group
- Pneumatic foot-pedal operation
- Steam-heated upper and lower padded pressing bucks
- Designed for continuous production environments
- Consistent pressing pressure for repeatable quality
- Ergonomic operation for reduced operator fatigue
- Heavy-duty industrial construction
- Excellent choice for garment manufacturers and textile finishing facilities

Typical Applications

- Trouser top pressing
- Denim garment finishing
- Jeans production
- Workwear finishing
- Uniform production
- Jacket and garment pressing
- Textile finishing operations
- Industrial laundries

- Commercial garment processing

Condition

Previously used in professional garment manufacturing.

The machine remained in production until the closure of the MASI JEANS factory and shows normal cosmetic wear consistent with industrial use.

Overall condition is good, and inspection is welcome prior to purchase.

Video available.

Location

Valga, Estonia

Dismantling & Transport

Buyer is responsible for dismantling, loading and transportation.

Sales Terms

Sold as-is, where-is, without warranty.

Part of the MASI JEANS factory liquidation.
