

Miller Pressen Hydraulic Clinch Inserter

Our hydraulic clinch inserter, all advantages at a glance:

- Guaranteed, lasting reliability through the use of high-quality components
- Simple handling and short changeover times
- Low maintenance and service requirements
- Very flexible due to the large number of possible applications
- Automatic feeding system, touch screen control etc. optional available
- Energy-saving, solid design with the energy efficiency of a hydraulic system
- Electronic and mechanical safety system for 100% safe processing of conductive and non-conductive materials
- Connection to the usual power supply (400V)
- Processing of all common press-in elements thanks to high press-in force, press-in nuts up to M12, threaded bushes up to M10, threaded bolts up to M8
- Continuous adjustment of the press-in force, repeatability +/-1%

Model 1065AF

Technical data

Dimension (LxWxH)	1550x1050x2140 mm
Gewicht	1500 Kg
Throat height	500mm
Throat depth	650mm
Cylinder stroke	200mm
Travel speed	110mm/Sec.
Cycle time	1200/hour
Max. Force	2-97 KN
Accuracy	+/-1%
Power supply	400 V, 50 Hz
Electrical power	3.0 KW
