

The high-pressure cleaners of the BMK series are powered by a Honda gasoline engine and therefore do not require an external power connection. They offer maximum mobility and flexibility for work in areas without infrastructure. The units are particularly distinguished by their simple design, which ensures long service life. Optionally, the machine can be equipped with an electric starter (E-start).

**INCLUDED****Standard accessory set SWS:**

- 10 m high-pressure hose DN 10 with kink protection on both ends
- High-pressure gun HDP 350 with quick-connect coupling and swivel joint at the inlet
- Stainless-steel double-jet lance with high- and low-pressure nozzles
