

Carl Zeiss - Axioplan 2 Imaging

Year of manufacture: 2002

Condition: ready for use, used

Functionality: fully functional

Price: € 9.990,00 plus VAT and delivery

Axioplan 2 Imaging is a universal complete solution that adapts to every application. It is a flexible, future-oriented microscope system that can be controlled either by computer or manually, captures and stores images digitally, and can communicate with other systems – a true digital microscope from A to Z.

Eight filter positions with a full 25 mm field of view, easily accessible in the compact reflector turret: this means maximum performance without compromise and provides space for a wide range of filter combinations, Optovar modules, multi-channel fluorescence, and a DIC analyzer.

Includes accessory for AXIOPLAN photomicroscope.
