Used filling monoblock Kosme completely refurbished in 2016

Machine type:	Filling Monoblock
Ref:	M251
Model:	24/24/6
Year:	2012
Speed:	9000 BPH
Condition:	In Storage
Price:	€ 239,000
Formats:	330 ml, 500 ml, 750 ml
Containers:	Glass
Products:	Water (Sparkling), Water (Still)

Technical details

Filler - Isobaric valve:	0	Isobaric:	Yes
Rotation:	1	Has rinser:	Yes
Has capper:	Yes	Filler - No. of valves:	24
Filler - Fill type:	5	Filler - Type of nozzle:	0
Safety features:	Yes	Manuals:	Yes

Description

Used Kosme Filling Monoblock Completely Refurbished in 2016

Introduction to the Kosme Monoblock

The Kosme filler, a filling monoblock with a 24/24/6 configuration for carbonated and still water, stands out for its reliability and high-performance capabilities. Additionally, this machine, refurbished completely in 2016 and unused since then, ensures optimal working condition.

Performance and Operational Capacity of the Used filling monoblock Kosme completely refurbished in 2016

This monoblock's operational capacity is remarkable; it produces 9000 pieces per hour for 330 ml bottles, demonstrating its versatility in handling various bottle sizes, ranging from 50 mm to 105 mm in diameter and from 150 mm to 350 mm in height.

Technical Features of the Monoblock

Among its key features, the presence of an aluminum cap and an effective rinsing system are noteworthy. Furthermore, the monoblock comes equipped with 24 grippers and utilizes a single treatment. Moreover, the filler incorporates 24 valves with an isobaric filling type and a fixed nozzle, while the capper features 6 heads for aluminum screw caps.

The filling machine accommodates caps with dimensions of 28×16 mm. It supports bottle heights ranging from a minimum of 160 mm to a maximum of 350 mm. Furthermore, the machine works with both 330 ml and 750 ml bottles, and it also fills volumes up to 1000 ml, with a minimum capacity of 200 ml.

Additionally, this model specifically fills round bottles. Clean Pack in Italy supplied the filler at the end of 2016, and technicians have since fully refurbished it with new spare parts to ensure optimal performance.

Current Status and Safety

This machine, currently stored in a warehouse, is ready for use and ensures safe operation. Additionally, manuals are included to facilitate easy operation and effective maintenance. Furthermore, the monoblock is equipped with integrated safety features and rotates counterclockwise for optimal operation.

Benefits of Purchasing a Refurbished Monoblock

Purchasing a used filling monoblock can provide advantages for companies seeking to reduce production costs without compromising quality. Moreover, the Kosme completely refurbished in 2016 offers the opportunity to benefit from the performance of a high-quality machine at an affordable cost.

Environmental Impact and Sustainability

Choosing a refurbished machine also means reducing the environmental impact associated with manufacturing new equipment. Reusing and refurbishing existing machinery contribute to waste reduction and resource optimization.

Conclusion of the Used filling monoblock Kosme completely refurbished in 2016

In conclusion, the Kosme monoblock, completely refurbished in 2016, is an excellent choice for companies seeking a reliable and cost-effective solution for their bottling needs. With its high-performance capabilities and impeccable condition, this machine stands out as an ideal solution to meet the production requirements of various beverages.
