

FOR TWO OPERATORS

HEATWEED HIGH 75/30

CAPACITY | 3750 -7500 m²/day

HIGH CAPACITY AND VARIOUS OPTIONS

The Heatweed High 75/30 has been developed for use by two machine operators on large areas. The machine can be used with two different weed lances, depending on requirements. Powered by an energy-efficient Kubota engine.

The machine comes as standard with a 1,000-litre water tank, weed lances and a cleaning lance. It can be carried on most vehicles with a loading capacity of 1,800 kg or more.

The High 75/30 has a very low noise level, low exhaust emissions and low water consumption. The machine is easy to use, reliable and weather-proof. Quick and easy to start. Automatic temperature control.

A WEED MACHINE AND HIGH-PRESSURE WASHER COMBINED

The Heatweed High 75/30 has been specifically developed as a weed machine, but is also excellent for cleaning façades, benches, litterbins, lampposts, monuments and gravestones. The pressure is infinitely variable up to 90 bar, depending on requirements.

RECOMMENDED APPLICATIONS

- In kindergartens and playgrounds
- In parks and green spaces
- In hedges with weed-suppressing membrane and bark chips
- In flowerbeds and gardens
- In cemeteries
- In stadiums and on artificial turf pitches
- In squares and streets
- At bus stops
- For cleaning
- For controlling invasive species
- Wherever weeds grow

THE LARGEST AREA TREATED AND LOWEST ENERGY CONSUMPTION PER LITRE OF WATER!

THE ORIGINAL | THE INNOVATOR | THE MARKET LEADER

Environmentally friendly, effective, economical machines specially developed for professional weed control with hot water.

 **HEATWEED**
TECHNOLOGIES
THE WEED CONTROL COMPANY

HEATWEED HIGH 75/30

- 100% water with no additives apart from decalcification liquid (natural product)
- Automatic temperature control (+/- 0.4 °C) ensures a stable water temperature and consistent weeding results
- Low water consumption per m2 means that water has to be topped up less frequently, leaving more time for weed control
- Quick and easy to start.
- High-precision operation with lightweight, ergonomic hand lances
- Inaccessible areas can also be treated, reach up to 60 metres
- Sturdy, reliable and weatherproof
- Low noise level and emissions
- Safe machine - no fire risk
- Can be used throughout the season in any weather
- Adjustable decalcification pump prevents calcification
- Simple loading and unloading by forklift
- No external generator required
- Ideal for cleaning

THE HEATWEED®-METHOD

Innovative and environmentally friendly weed control with hot water! The Heatweed® Method is verifiable, tried and tested, and safe. The method has a systemic effect on the plant's roots, so fewer treatments are required.

Compared with other chemical-free solutions, the Heatweed® Method offers the best weeding results, the longest regrowth time and the most cost-effective operation - as documented. We can cite hundreds of satisfied customers in Europe!

STANDARD SPECIFICATIONS

Capacity: 3,750 - 7,500 m²/day (75 hectares/season)*

Water consumption for weed control: 30 litres/minute

Pressure for weed control: 0.1 bar

Pressure for cleaning: Infinitely variable up to 90 bar

Water temperature for cleaning: Adjustable up to 85°C

Automatic temperature control with display: 99°C at the weed

Capacity of water tank: 1,000 litres (1,600 x 750 x 1,550 mm)

Fuel for operation/engine: Diesel/Aspen D Biodiesel

Capacity of tank for operation/engine: 40 litres

Emissions class of Kubota diesel engine: Stage IVB

Number of burners: 2

Fuel for burner: Diesel/Aspen D Biodiesel

Capacity of tank for burner: 80 litres

Colour: RAL 5010 (base) and RAL 9006 (housing)

Hose: 2 x 15 metres

Hose reel: 2 integrated automatic reels

Measurements (l x w x h): 1,351 x 1,001 x 1,314 mm

Weight: 585 kg

Lances with standard package: 2 x 20 cm weed lance and 1 x high-pressure cleaning lance

OPTIONAL EXTRAS

- Other water tanks on request
- Hose extension 15 m (up to 60 m)
- Option of using preheated water (max. 60°C)
- Pressure infinitely variable up to 130 bar
- Weed lance with wheels: 20, 40 or 80 cm wide
- Cleaning lance rotating nozzle or with brush
- Filter set for using surface water
- Combiframe for machine and water tank (500/1,000 litres)

* Real empirical figures for customers
