

The Fini Cube 10 is a compact, direct-drive, oil-injected rotary screw air compressor known for its quiet operation and ease of installation. It features a [coaxial drive system](#) for high efficiency and offers a fixed [10 bar pressure setting](#). Available in various configurations, including floor-mounted and receiver-mounted options, the CUBE 10 is suitable for continuous use, even in demanding environments.

Key Features & Benefits

- **Compact Design:**

The CUBE 10 is designed for a small footprint, making it easy to fit into tight spaces.

- **Quiet Operation:**

An acoustic enclosure helps to reduce noise levels, contributing to a quieter working environment.

- **Direct Drive Transmission:**

The coaxial drive system ensures efficient power transfer from the motor to the air-end, maximizing reliability and performance.

- **Easy Installation & Maintenance:**

The design prioritizes simple installation and straightforward access for maintenance tasks.

- **Fixed 10-Bar Pressure:**

The compressor is set to operate at a continuous pressure of 10 bar (145 psi).

- **Continuous Operation:**

Built to run continuously under demanding industrial conditions, ensuring consistent compressed air supply.

Available Models

The Fini Cube 10 series includes models with varying motor powers, such as:

- [CUBE 4.0-10](#): 4 kW power
- [CUBE 5.5-10](#): 5.5 kW power
- [CUBE 7.5-10](#): 7.5 kW (10 hp) power

Configurations

The CUBE 10 can be configured in several ways to suit specific needs:

- **Floor-Mounted:** Unit placed directly on the floor.
- **Receiver-Mounted:** The compressor unit is mounted onto an air receiver tank.
- **With or Without a Dryer:** Options are available to include a compressed air dryer.
